

Chapter 1

1. HIV related condition such as TB, PNA, Sepsis, Kaposi Sarcoma, Herpes zoster, HSV, CMV
Pdx –B20
Sdx- HIV related conditions
2. HIV unrelated condition
Pdx – Unrelated condition
Sdx – Z21/B20
3. Localized infection with Sepsis such as cellulitis, UTI, PNA, appendicitis
Pdx – Sepsis
Sdx – localized infection
4. Postprocedural sepsis
Pdx – Complication
Sdx - Sepsis
5. Non infections condition eg fracture, burn with sepsis
Pdx- either can be assigned as pdx based on focus of treatment
6. SIRS due to infections process with sepsis
Pdx – Sepsis
7. SIRS due to infectious process without sepsis
Pdx – Infection disease
Sdx- SIRS
8. SIRS due to non-infectious process with/without acute organ dysfunction
Pdx – Noninfectious process
Sdx – SIRS
9. Sepsis following abortion
Pdx – O03 series
Sdx – organism
10. OB surgical wound following sepsis
Pdx-O series
Sdx – Sepsis
11. Sepsis due to MSSA/MRSA
Pdx – Sepsis
Sdx – Organism (eg E.coli, MRSA, MSSA)
12. Covid due to sepsis
Pdx – Sepsis due to virus

Sdx – COVID

13. COVID due to PNA, CODP, ARF, Bronchitis
Pdx – COVID
Sdx – Respiratory conditions
14. COVID in Pregnancy
Pdx – O series
Sdx – COVID

Chapter 2

1. Anemia due to cancer
Pdx – Cancer
Sdx – Anemia in neoplastic disease
2. Complication due to cancer such as dehydration, hypocalcemia, malnutrition
Pdx – Complication (based on the focus of treatment)
Sdx – cancer
3. Primary cancer vs secondary cancer
Pdx – depends on the focus of treatment
4. Malignant neoplasm in transplanted organ
Pdx – complication
Sdx – C80.2
Sdx – Type of cancer
5. Malignant neoplasm in pregnancy
Pdx – O series
Sdx – Type of cancer
6. Pain due to neoplasm only pain management is administered
Pdx – Pain in neoplastic disease
Sdx – type of cancer
7. Pathological fracture due to neoplasm
Pdx – pathological fracture
Sdx- type of cancer
8. Admission for planned chemo/radiation/immune therapy
Pdx – Z51 series
Sdx – type of cancer
9. Admission for anemia due to chemo/radiation/immune therapy
Pdx – anemia due to antineoplastic therapy

Sdx – Adverse effect of drug

Sdx – cancer

10. After care following surgery
Pdx – Z48.3
Sdx – type of cancer
11. Malignant pleural effusion and malignant ascites
Pdx – cancer
Sdx – Malignant pleural effusion/ascites

Chapter 3

1. Anemia in CKD/Neoplasm/other chronic disease
Pdx – Underlying conditions such as CKD/neoplasm/chronic condition
Sdx – Anemia

Chapter 4

1. DM with CKD/PVD/foot ulcer
Pdx – DM
Sdx – specific complication

Chapter 6

1. Acute pain and chronic pain
Pdx – acute pain
Sdx – chronic pain
2. Pain due to definite condition
Pdx – Definite condition

Chapter 9

1. CVA with symptoms
Pdx – CVA
Sdx – symptoms
2. HTN with CHF
Pdx – HTN with heart failure
Sdx – type of heart failure
3. HTN with CKD and CHF
Pdx – HTN with HF and CKD
Sdx – Type of CHF
Sdx – CKD stage
4. CHF due to pleural effusion
Pdx – CHF
Sdx – Pleural effusion if thoracentesis performed
Sdx- secondary HTN

Chapter 10

1. CODP with unspecified asthma
Pdx – COPD
2. COPDE with unspecified asthma
Pdx – COPDE
3. COPD with acute bronchitis
Pdx – COPD with LRTI
Sdx – Acute bronchitis
4. COPD with/without Exacerbation and emphysema
Pdx – Emphysema
Note: dont code COPD
5. Influenza with pneumonia
Pdx – Influenza

Chapter 11

1. Cholelithiasis with cholecystitis and obstruction
2. GERD with esophagitis
3. Hernia with obstruction
4. Acute appendicitis with perforation/
abscess/peritonitis/gangrene
5. Gastritis/ulcer with bleeding
6. Hemorrhoids and colitis – don't code bleeding
additionally
7. Gastric cancer with bleeding
Pdx – cancer
Sdx- GI bleed

Chapter 12

1. Pressure ulcer with stage – code highest stage
2. Non-pressure ulcer with higher severity

Chapter 13

1. Osteoporosis with/without pathological fracture
Pdx – Pathological fracture
Sdx – Osteoporosis
2. Pathological with periprosthetic fracture
Pdx – Pathological fracture
Sdx – periprosthetic fracture

Chapter 14

1. Hydronephrosis with calculus and infection
Pdx – Pyonephrosis

2. BPH with LUTS such as urinary frequency, hesitancy,
incontinence, obstruction, retention, urgency
Pdx – BPH
Sdx – code the LUTS

Chapter 15

1. Check gestational week less than 37 (pre term) and
greater than 40 weeks (post term)
2. Age less than 16(younger) and greater than 35
(elderly)
3. Routine check up – Z34.0
4. Antenatal screening – Z36
5. Incidental pregnancy – reason for visit and Z33.1
6. Check for complication in pregnancy such as DM,
HTN, Malpresentation, laceration, nuchal cord with
compression, IUFD, Small for dates, large for dates,
polyhydramnios, Oligohydramnios, etc
7. Missed abortion – less than 20 weeks
8. IUFD – More than 20 weeks
9. Capture gestational week and out of delivery for
antepartum and childbirth episode
10. Postpartum period – 6 week from delivery

Chapter 16 & 17

1. Live born code via C-section or vaginally
2. New born health examination
3. Suspected condition ruled out
4. Congenital condition – club foot, accessory finger,
PFO, ASD, cleft lip, palate, tie tough
5. Newborn complications – IDM, Hypoglycemia,
jaundice, ARD, ARDS, dehydration
6. Community acquired condition – J series should be
coded

Chapter 18

1. GCS – all traumatic cases except for medically
induced coma and sedated
2. NIHSS scores - All CVA/stroke cases

Chapter 19

1. Fracture – open wound/laceration – sprain/strain –
contusion – abrasion

2. Check for open or closed fracture – default code as
closed
3. Check for 7th character
4. Overdose/toxic effect will be 1st listed dx
5. Adverse effect/under dose will not be pdx – code
complication as pdx followed by adverse effect
/under dose
